Residual Control of Tough Weeds in Spring

Weed resistance is a growing problem. Regardless of where you farm and what weed control product you use, a single herbicide mode of action, such as glyphosate, is simply no longer adequate to protect your yield and long-term profitability. Valor[®] Herbicide controls tough broadleaf weeds and has become the top selling pre residual because of its proven performance. *Valor* provides growers with residual control of Palmer amaranth, waterhemp, lambsquarters, velvetleaf, dandelion and marestail.

Valor offers:

- Excellent residual control of glyphosate-resistant weeds including Palmer amaranth and waterhemp
- Rotational flexibility to many crops such as soybeans, corn and wheat
- Increased yield by controlling weeds before they steal moisture and nutrients from the crop

How To Use

Rate	<u>Soybeans</u> : 2 – 3 oz/A <u>Corn</u> : 2 oz/A up to 7 days prior to planting. Atrazine @ 0.5 to 1 lb ai/A, can be applied either with <i>Valor</i> OR with the early postemergence Roundup WeatherMAX® or Roundup PowerMAX® application.
Timing	<u>Soybeans</u> : Preplant or preemerge <u>Corn</u> : Preplant – 7 days <u>prior</u> to planting (minimum or no-till)
Method	Ground or Air
Adjuvant	Add per burndown partner’s label recommendation. Valent recommends use of a Chemical Producers & Distributors Association-certified adjuvant.
Roundup Ready PLUS®	<i>Valor</i> qualifies for Roundup Ready PLUS soybean incentives. See www.RoundupReadyPLUS.com for full details.
